

Diagnosis:

1. judgment of the nature of illness with someone, by examining them closely (ISO/TS 5346:2022(en), 3.2.9).
2. diagnostic conclusion of the pathological changes at a certain stage of a disease, including the location, cause and nature of the disease as well as the trend of development, which suggest appropriate treatment. Note 1 to entry: TCM pattern is specific to the individual (ISO/TS 5346:2022(en), 3.2.10).

Severity:

1. measure of the possible consequences of a hazard (ISO 22679:2021(en), 3.30).
2. gravity of possible consequence of nonconformity (ISO 24096-1:2024(en), 3.4).
3. level of potential harm (ISO 14798:2009(en), 2.15).

Prescription:

1. direction created by an authorized health professional to instruct a dispensing agent regarding the preparation and use of a medicinal product or medicinal appliance to be taken or used by a subject of care (ISO/TS 19256:2016, 3.34).

Symptom:

1. indicator for the condition of a structure or structural member, based on one or more characteristics (ISO 16311-2:2024(en), 3.12).
2. untoward medical occurrence in a patient or clinical investigation subject administered a pharmaceutical product that does not necessarily have a causal relationship with this treatment (ISO/TR 21835:2020, 3.13).
3. perception, made by means of human observations and measurements (descriptors), which may indicate the presence of one or more faults (3.1.12) with a certain probability (ISO 6781-1:2023(en), 3.1.8).
4. A subjective manifestation of a pathological condition. Symptoms are reported by the affected individual rather than observed by the examiner (DSM-5...).
